

## Stage-wise Lead Analysis by Source

Add the total in front of lead stage and then start with substage from next row

| LEAD STAGE       | SUB-STAGE                            | TOTAL LEADS | GOOGLE | META | CONVERSION RATE |
|------------------|--------------------------------------|-------------|--------|------|-----------------|
| 1 NOT INTERESTED | Not Eligible for Course              | 106         | 66     | 40   | 100%            |
|                  | Joined another Institute             | 5           | 3      | 2    | 100%            |
|                  | Got Placed                           | 7           | 4      | 3    | 100%            |
|                  | Tried Calling Many Times but Ringing | 114         | 46     | 68   | 100%            |

## Lead Percentage

$=(\text{stage total leads} / \text{total leads}) \times 100$

**(Lead Cost/Spend)** stage total leads cost / total spend

$= \text{stage total leads} \times \text{CPL}$  (CPL of all total spend of all platforms)

## Lead Spend in %

$=(\text{stage total leads cost} / \text{total spend}) \times 100$

## Campaign Metrics by Source

CTR & CPC are not getting calculated for meta

CTR = impressions / clicks

CPC = Spend / clicks

Conversion = show total conversion from Google and Meta

| Campaign Metrics by Source                                                                                                                                    |            |             |        |       |        |            |

| Note: CTR = Click-Through Rate, CPC = Cost Per Click, Conv. Rate = Conversion Rate (clicks to leads). Organic traffic metrics not tracked via paid platforms. |            |             |        |       |        |            |

## Detailed Metrics Comparison

DIFFERENCE - show actual value not percentage

## Platform Comparison: Google Ads vs Meta Ads

Remove one liner mention bellow the matrix

Qualified leads - Meta leads must show the total of ig & fb leads

## Average CPL

Google spend / google leads

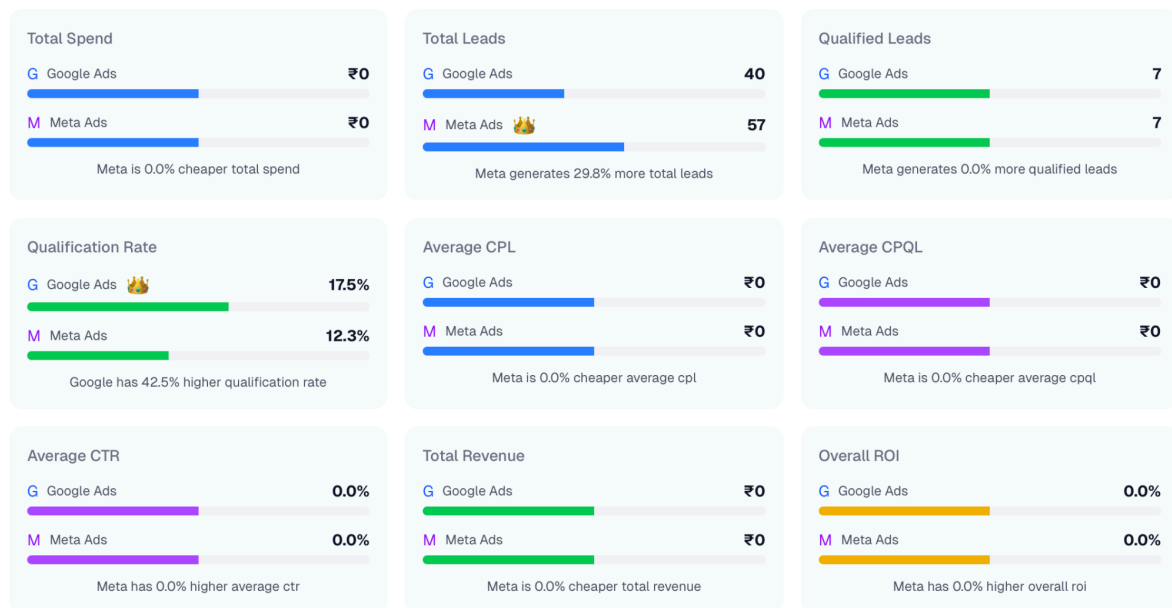

Meta leads / meta leads

## Average CPQL

Google spend / google Qualified leads  
Meta leads/meta Qualified leads

### Avg CTR

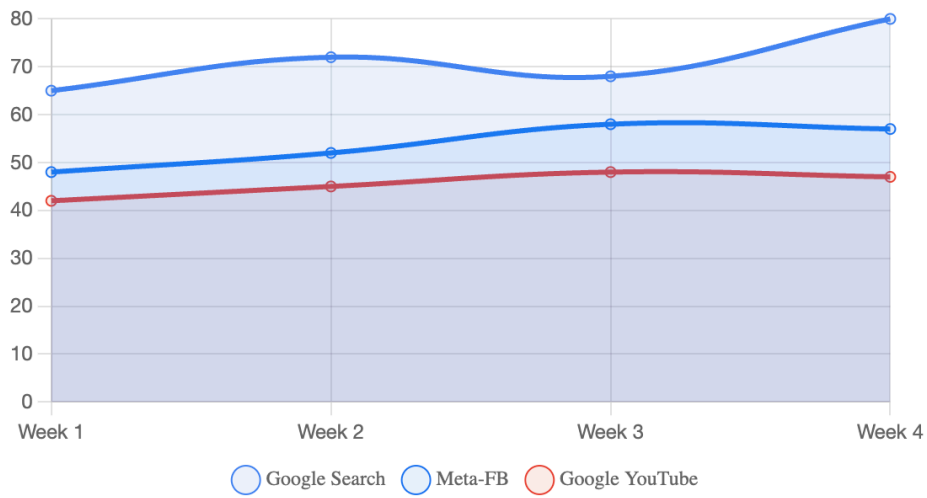

Google impression/Google clicks  
Meta impression/Meta clicks

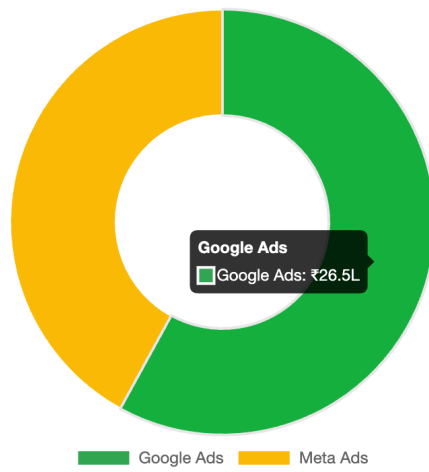

### Lead Volume Trend (Platformwise)

Should have start date end date, 7,30,90 days filter  
Google, Meta (FB, Instagram)  
Should take data from lead table

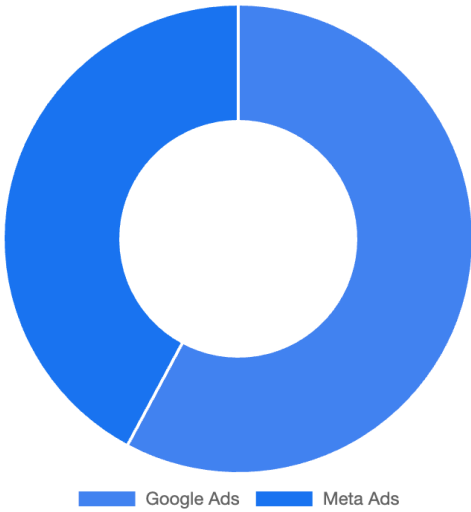

### Lead Volume Trend (Last 30 Days)

### Revenue Attribution

**21- 11-2025 ->**

1. In Leads sheet we have to add a **time** column for **Peak Performance Hours**
2. Best Performing Days of Week and Peak Performance Hours need a source wise (ig, fb, google).
3. **Month-over-Month Comparison** needs to add a meta and google column. If value is negative then color will be red
4. For **Ad Performance Leaderboard** - We have to add one common field in lead table for meta and google (ad\_id, ad\_group\_id).
5. **Lead Volume Trend** also need a current moth data also include (Nov, Oct, Sep)
6. **Daily Spend Trend, Daily Leads Trend** need to add two more line for Google and meta
7. **Qualification Rate Trend** need to add a source meta and google
8. **Top 10 Best Performing Creatives** - We have to add one common field in the lead table for meta and google (ad\_id, ad\_group\_id). Also check the **creative\_type** in meta and google ads
- 9.
